

Purifies, activates, ionizes and humidifies air.

Defensor Air Center
**A breath of fresh air
in system design.**

 **Defensor®**

The intelligent Defensor Air Center purifies, activates, ionizes and humidifies air.

The Defensor Air Center purifies air.

No more problems with allergies and hay fever.

Take a deep breath ... and notice the difference. The Defensor Air Center's advanced four-layer filter traps even microscopic dust particles and pollen. Which effectively prevents allergies and puts an end to annoying irritations. Harmful gases and air-borne dust, as well as smells and tobacco smoke are intercepted and purified in the twin-layer active carbon filter. The Defensor Air Center circulates the air in rooms up to 50 m² or 125 m³ once an hour.

The Defensor Air Center ionizes air.

No more bacteria and dust particles.

Really fresh air – the kind you find in forests and up in the mountains – usually contains more than 1500 ions per m³. Air in closed rooms has practically none. The system's ionizer artificially produces ions, which attract and bind even the tiniest air-borne particles together. These larger specks of dust are then effectively removed by the filters.

When it comes to air purification, nothing's too small for the Defensor Air Center.

Nothing's too small for the ionizer.

The Defensor Air Center humidifies air.

No more dry throats and noses.

When people spend their time in closed or centrally heated rooms, their health inevitably suffers. Dry air puts a considerable strain on the upper respiratory tract and weakens resistance to infectious diseases such as colds and flu as well as headaches and general illness. In situations like these, the Defensor Air Center is a boon. It humidifies purified air and distributes it equally throughout the room. Ideal humidity and pleasant air guarantee healthy surroundings.

The water ionizer prevents the formation of algae or bacteria.

The Defensor Air Center ionizes its water.

**No more stagnant,
unpleasant-smelling water.**

The Defensor Air Center puts an end to stale water and unpleasant odours. A water ionizer prevents the formation of algae or bacteria and keeps the water clear and fresh. In addition, an LED display tells you when to add water or change the filter.

Advanced electronics for complete control over air quality.

The container takes six litres and can be filled at any sink.

for your health and well-being.

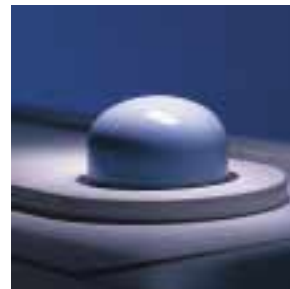

The Defensor Air Center activates air.

No more stale, musty air.

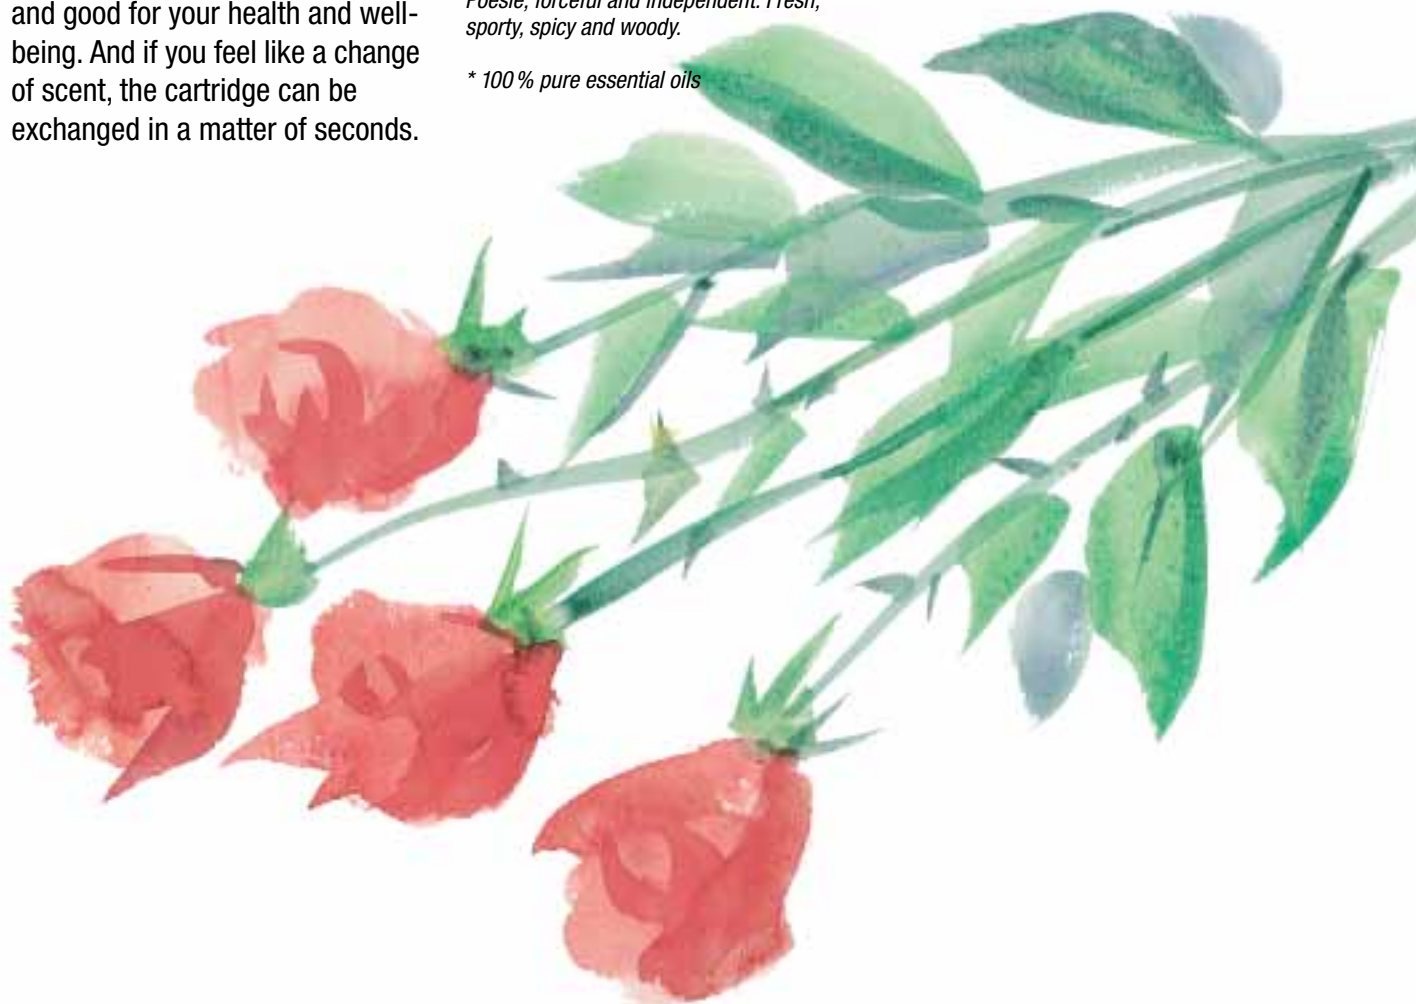

The Defensor Air Center has an integrated air activator to create a unique kind of atmosphere. A special fragrance cartridge can be inserted to create an individually scented environment. The 'Air Center' automatically releases the fragrance into the purified air at the required concentration, where its scent can develop naturally. There is a choice of eight different fragrances – five consisting of 100 % essential oils – every one of which is pleasantly refreshing and good for your health and well-being. And if you feel like a change of scent, the cartridge can be exchanged in a matter of seconds.

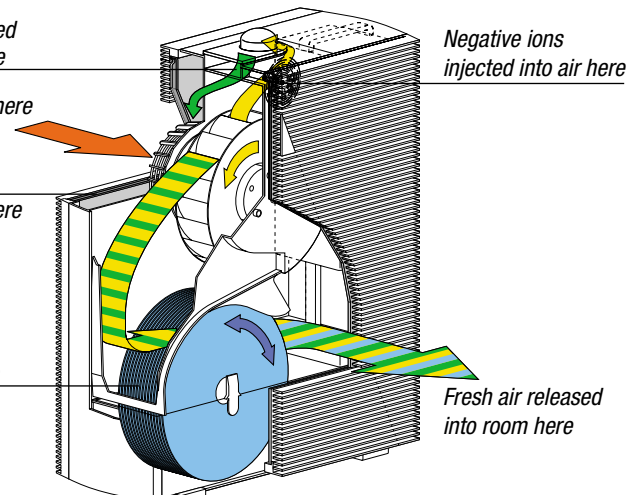

A refreshing choice of fragrances:

- * Standard, with the scent of birch trees. Fresh, airy, cool, fruity and sunny.*
- * Waldwiese, for the fresh smell of a spring meadow. Woody, mossy, green, leafy with a touch of blossom.*
- * Power, for the smells of the forest. Fresh pine aroma with a hint of citrus fruits.*
- * Relax, for recreation and silence. Sweet, woody and a touch of blossom.*
- * Eros, tender and sensitive. A touch of blossom, woody, spicy and a touch of musk.*
- Oriental, for the perfume of 1001 nights. Flowery, fruity and exotic.*
- Flower, feels like paradise. Green, flowery and fresh.*
- Poesie, forceful and independent. Fresh, sporty, spicy and woody.*
- * 100 % pure essential oils*

This container is the key to your well-being. Fragrance cartridges are exchanged in seconds.
